

# KOMPOTOI

## RENTAL, PLANNING AND SALES

- **Independent of water and power supply.**
- **Without pollution and consumption of drinking water.**
- **Adults and children experience that sustainability can be fun.**
- **Easy to use:  
Maintenance can individually be taken care of by us or the tenants.**

The produced faeces are being composted and turned into valuable earth. Nitrate fertilizer is made from the urine. We close an important natural cycle by creating soil conditioner out of "human output".

### OUR TOILETS ARE SUITABLE FOR:

- Festivals
- Public pools, recreation areas
- Construction sites, parking lots
- Motorway service stations
- Forest kindergartens, playgrounds

## PLANNING

#disabilityaccess

KOMPOTOI plans your facility for public areas or individually for a single or multi-family house.

There is great potential for compost toilets!! Our toilets are ideal for locations without sewerage connections. We are at your disposal for individual advice on a suitable solution.

### PUBLIC TOILET FACILITIES

Do you need a toilet facility far from a sewerage connection? No problem. The dry toilets work without water, without electricity, without chemicals and without connection to the sewerage system.

## SALES

KOMPOTOI sells toilet solutions.

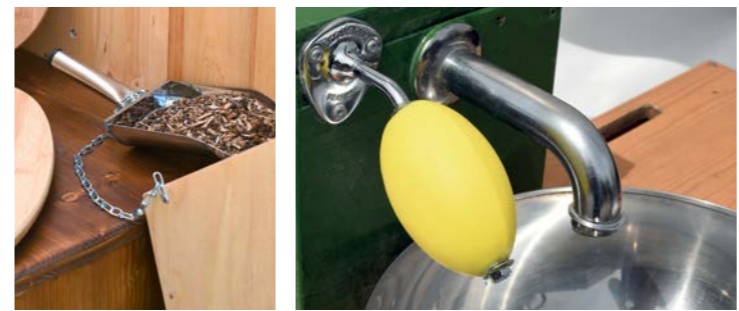

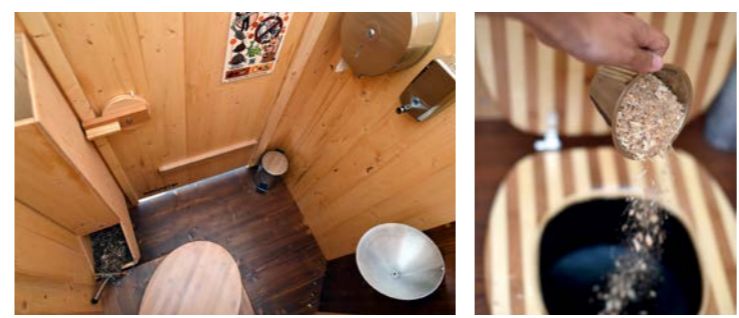

At **Kompotoi** you will find the largest selection of compost toilets for private or public use. We are happy to help you find the right solution for your needs, and look forward to your inquiry.

### PRIVATE INSTALLATIONS

Composting toilets also offer many advantages in-house. They are odorless, do not need water, and the compost can be used. Are you planning a new building or renovation? Invest into a promising idea now!
